

# Mayhaw Fertilization by Billy Craft

## Rates

- Phosphorus = 2 pounds/1000 sq. ft. of tree covering
- Potash = 3 pounds/1000 sq. ft. of tree covering

## Example (Phosphorus)

- Mayhaw tree covering 400 sq. ft. (20ft. X 20ft.)
- 40% of 2 pounds = .8 pound -- Note 1 pint of phosphorus = 1 pound
- Amount = .8 pint/tree

## Example (Potash)

- Mayhaw tree covering 400 sq. ft. (20ft. X 20ft.)
- 40 percent of 3 pounds = 1.2 pounds -- Note 1 pint of potash = 1 pound
- Amount = 1.2 pints/tree

## Example (young tree) -- 5ft. X 5ft. = 25 sq. ft.

- 2.5 percent of 3 pounds = .075 pounds
- Amount = .075 lb./tree
- Based on recommendations used in large apple orchards.
